About me

Publications

Why is latency between the peripheral and the game engine so important in E-sports?

Interests

Languages, Science, IT, Philosophy, Astronomy, Human Relations, Cooking

Travels

Ireland (International Semester, Dublin - 2023)
England (School trip to London – 2019)
Italy (School trip to Rome, Pompeii – 2018)
China (School trip to Beijing, Xi'an – 2018)
United States (Western United States, 2013)

Qualifications and Languages

UPEC degree (Admitted, obtained in 2024)
English (TOEIC, 835/990, obtained in 2024)
English (Cambridge First, obtained in 2021)
BAC (European Section, TB distinction, obtained in 2021)
Chinese (HSK 3, obtained in 2020)

Training and Certifications

PSC1 - Civil Prevention and Rescue (Level 1)
Health and Safety at Work
Driving licence + vehicle

Portfolio and Projects

Training

EPITA 2021 — Today
School of Computer Engineering (Mathematics, Computer Science, Electronics and Embedded Systems, Humanities, Languages, Project Management, CSR, Law...)

UPEC Bachelor's Degree obtained 2024

International semester - Ireland 2022 — 2023
Dorset College (Dublin) — (Web Development, OOP)

European General Baccalaureate with honours 2020 — 2021
Ste Marie School (Bourges) - Mathematics, Advanced Mathematics, IT

Experience

End-of-Study Internship - Embedded Engineer - Elsys Design March 2026 - August 2026
Exploring the RISC-V architecture and ISA for an industrial application

Delegate for Majeure GISTRE 2026 - EPITA 2025 — Today
Ordering promotional sweaters, holding plenary meetings, implementing solutions to improve the working environment for all students, communicating important information, and resolving issues.

Software Internship - Asterios Technologies (Massy) September 2024 – January 2025
Developing a Language Server for PsyC in Rust with TreeSitter and TowerLSP

Projects

Conception of a Micromouse September 2024 - Today
- Conception and development of a Micromouse device.
- **Technical environment:** C, STM32, Kicad 8.0
- **Skills:** Soldering, PCB Design

Decathlon: Final year project March 2025 – February 2026
- Firmware migration from a sports watch to Zephyr RTOS [NDA]
- Drafting of project specifications, technical specifications, a test and validation plan, and a Gantt chart.
- Software architecture design, team management, project management, organisation of follow-ups and deliverables.
- Software configuration of various sensors with a Device Tree and a Zephyr patch.
- **Technical environment:** C, Nordic, Zephyr, Gitlab, Device Tree
- **Skills:** Datasheet analysis, software design, team/project management.

DRIL: Development of a Linux driver for MFRC522 October 2025
- Development of a Linux driver capable of managing multiple MFRC522 card readers on the same device.
- **Technical environment:** C, RFID
- **Skills:** Specification analysis, problem detection

Skills

Programming languages
Python, Ocaml, JavaScript, WPF (XAML), C, Rust, SQL, Postgres, C++, Haskell (beginner), Lisp (beginner), Assembly (x86), VHDL, Latex

Software & Technologies
VIM, GIT, MS Office, Suite JetBrains, VSCode, GitHub, Figma, Discord, TeamViewer, ZSH, GDB, Notion, Nvim, STM32CubeIDE, ArduinoIDE, Quartus, Modelsim, Kicad
Windows (Main), WSL, Linux (Ubuntu, NixOS)
