

Kévin JAMET

Embedded Computer Engineering Student at EPITA

Graduated from UPEC in 2024

Currently seeking a graduate job in
Embedded Engineering from
September 2026.

About me

Publications

Why is latency between the peripheral and the game engine so important in E-sports?

Interests

Languages, Science, IT, Philosophy, Astronomy,
Human Relations, Cooking

Travels

Ireland (International Semester, Dublin - 2023)
England (School trip to London - 2019)
Italy (School trip to Rome, Pompeii - 2018)
China (School trip to Beijing, Xi'an - 2018)
United States (Western United States, 2013)

Qualifications and Languages

UPEC degree (Admitted, obtained in 2024)
English (TOEIC, 835/990, obtained in 2024)
English (Cambridge First, obtained in 2021)
BAC (European Section, TB distinction, obtained in 2021)
Chinese (HSK 3, obtained in 2020)

Training and Certifications

PSC1 - Civil Prevention and Rescue (Level 1)
Health and Safety at Work
Driving licence + vehicle

Portfolio and Projects

Training

EPITA

School of Computer Engineering (Mathematics, Computer Science, Electronics and Embedded Systems, Humanities, Languages, Project Management, CSR, Law...)

2021 — Today

UPEC Bachelor's Degree obtained

2024

International semester - Ireland

Dorset College (Dublin) — (Web Development, OOP)

2022 — 2023

European General Baccalaureate with honours

Ste Marie School (Bourges) - Mathematics, Advanced Mathematics, IT

2020 — 2021

Experience

End-of-Study Internship - Embedded Engineer - Elsys Design

March 2026 -
August 2026

Exploring the RISC-V architecture and ISA for an industrial application

Delegate for Majeure GISTRE 2026 - EPITA

2025 — Today

Ordering promotional sweaters, holding plenary meetings, implementing solutions to improve the working environment for all students, communicating important information, and resolving issues.

Software Internship - Asterios Technologies (Massy)

September 2024 - January
2025

Developing a Language Server for PsyC in Rust with TreeSitter and TowerLSP

Projects

Elsys Design: End of Studies Internship

March 2026 – August 2026

- ▶ Exploring the RISC-V architecture and ISA for an industrial firm
- ▶ Draft of project specifications, technical specifications related to the industry needs
- ▶ SoC integration on Xilinx FPGA, Hardware architecture review and fixes, IO and Timing constraints, organisation of weeklies
- ▶ Consulting documentation for future projects
- ▶ **Technical environment:** Xilinx FPGA, System Verilog, Verilog, TCL, DDR4, AXI
- ▶ **Skills:** Datasheet analysis, hardware design, hardware verification, consulting

Decathlon: Final year project

March 2025 – February 2026

- ▶ Firmware migration from a sports watch to Zephyr RTOS [NDA]
- ▶ Drafting of project specifications, technical specifications, a test and validation plan, and a Gantt chart.
- ▶ Software architecture design, team management, project management, organisation of follow-ups and deliverables.
- ▶ Software configuration of various sensors with a Device Tree and a Zephyr patch.
- ▶ **Technical environment:** C, Nordic, Zephyr, Gitlab, Device Tree
- ▶ **Skills:** Datasheet analysis, software design, team/project management.

DRIL: Development of a Linux driver for MFRC522

October 2025

- ▶ Development of a Linux driver capable of managing multiple MFRC522 card readers on the same device.
- ▶ **Technical environment:** C, RFID
- ▶ **Skills:** Specification analysis, problem detection

Skills

Programming languages

C, Rust, VHDL, CUDA, Python, x86 Assembly, C++, Ocaml, JavaScript, WPF (XAML), SQL, Postgres, Haskell (beginner), Lisp (beginner), Latex

Software & Technologies

Nvim, GIT, Github, Gitlab, MS Office, Suite JetBrains, VSCode, GitHub, Figma, Discord, TeamViewer, ZSH, GDB, Notion, STM32CubeIDE, ArduinoIDE, Quartus, Modelsim, Kicad, Typst, AMD Vivado
Windows (Main), WSL, Linux (Ubuntu, NixOS, Arch, Fedora)
